SHINING TECHNOLOGIES CITIDISK™ PRICING

“SAVE SHOOTING/RECAPTURE TIME”

PLUG INTO CITIDISK™ HDV

Time is money. And since you can't re-capture time, the CitiDISK HDV is a highly effective tool, eliminating the time consuming process of re-capturing HDV/DV footage from HDV/DV camcorder tapes into non-linear editing (NLE) systems. CitiDISK HDV is powerful, lightweight, portable, and with its internal rechargeable battery, it connects directly to HDV/DV camcorders and captures HDV/DV footage to its miniature high-capacity hard drive and to tape simultaneously - directly from the camera's FireWire port into your choice of file-formats (.M2T, .MOV, .AVI, .DV and others). When done shooting, set your camcorder to VCR mode to "QPLAY" the last scenes on the viewfinder or simply plug it into your computer's FireWire port and edit/play directly on the digitized video at anytime. A Firewire based external hard disk (5400rpm IBM/Hitachi) product recording HDV & DV streams directly off of HDV equipped camcorders. It also functions as a regular external Firewire based hard disk drive while not in recording mode.

Compatible HDV camera: Sony HVRZ1U, FX1, A1U, HC1, Canon XLH1, XH A1/G1, HV20, JVC GYHD100U, GYHD110 and other DV25 camera in the market.

The package includes the following:

- One CitiDISK HDV unit fw1256h with internal battery (not fully charged)
 - One carrying pouch
 - One 6pin-4pin (1.5 meter in length) Firewire Cable
 - One 100-240 volt AC input, output +12 volt DC wall-mount power adapter
 - One v3.2 CD (includes drivers and Windows/MacOS9.2x based partition/format utility)
- **100GB [360min.] MSRP (\$949) VA Media (\$890)**
 - **120GB [540min.] MSRP (\$1069) VA Media (\$1001)**

PLUG INTO CITIDISK™ HD
